

Cloud Voice Portal Quick Start Guide

Welcome

Welcome to BTC Cloud Communications! This guide is intended to get you up and running with the basic features associated with the product. For more in-depth information, please see the tutorial videos on at BTCBroadband.com. You can also contact our local customer care team at 918-366-8000 and we will be happy to assist you.

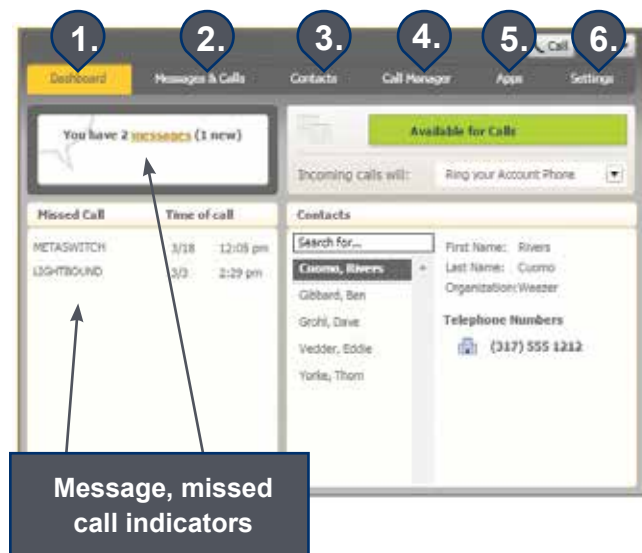

The Cloud Voice Portal is the web portal used to configure the features on your new phone system. You can:

- View missed calls
- Listen to voicemail messages
- Manage your contacts
- Set up rules to route your calls
- Perform many other functions

To get started, go to the login page at: BTCBroadband.com. (Consult your administrator regarding your default password. Once you log in, you will be prompted to create a new password.)

Note: This guide is representative and images may vary from your individual screens.

Once you are logged in you will see the main Cloud Voice Portal screen:

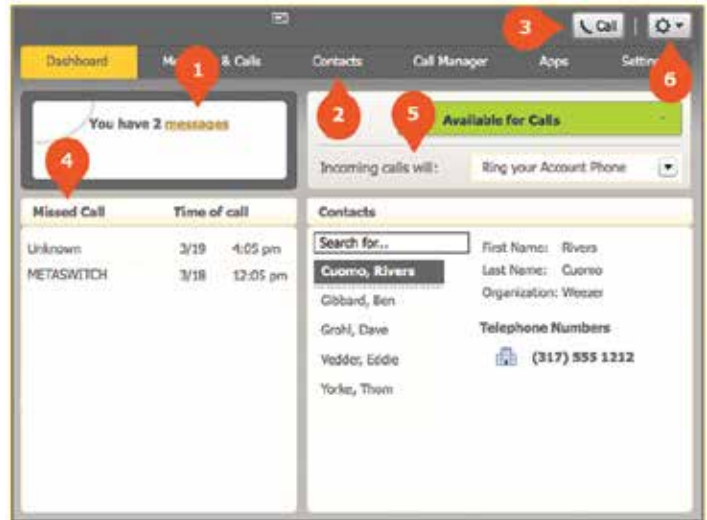

- **Dashboard** - Quick view of most common functions
- **Messages and Calls** - Access call history
- **Contacts** - Store and retrieve contact information

- **Call Manager** - Manage how your incoming calls are handled
- **Apps** - Adds applications to your service
- **Settings** - Change your call settings

Dashboard

The dashboard is the main screen for the portal. On it you can view a range of information including recent calls, messages, contacts, and customized settings.

1. **Voicemails** - Click this area to view and retrieve voicemails
2. **Contacts** - Import your contacts from Outlook or create new ones, then click on a name to dial
3. **Call Button** - Use to make new calls to numbers that may not be in your address book
4. **Missed Calls** - Click any missed call in the list to call the number back
5. **Active Settings** - For example, if you are forwarding your number, that information would appear here; click to adjust
6. **Settings** - Logout, refresh or scroll to Help to view step-by-step tutorials describing how to perform tasks within the Cloud Voice Portal.

Messages and Calls

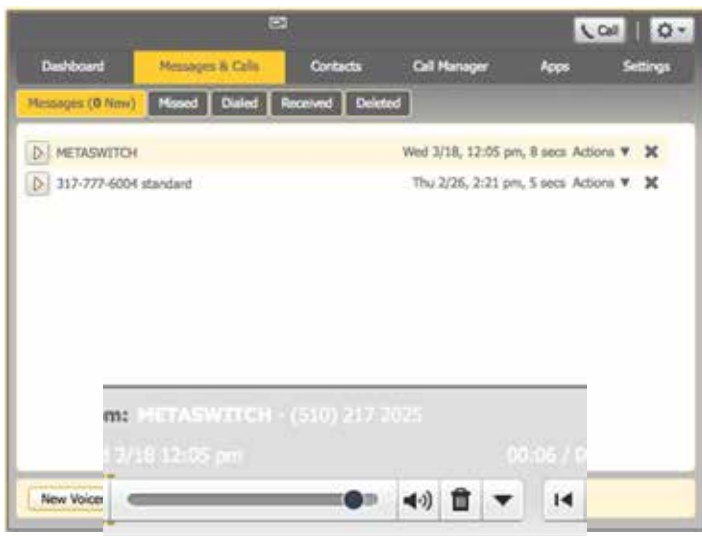

The Messages and Calls tab displays all recent call activity. Here you can retrieve voicemails and view calls based on whether they were missed, received, dialed, or deleted.

Click on one of the subtabs to get more detail. Click the 'play' arrow button to listen to a voicemail. Note that you can listen to your voicemails in any order. A window (as shown over the Messages and Calls screen) will open and you will have the option to save or delete either on the player screen or main screen.

Click the 'New Voicemail' button at the bottom of the page to record and leave a voicemail as a memo (your computer must have a microphone to use this function).

Click the icon at the end of the line to mark as Heard/New, Forward as Email, or Forward as Voicemail.

From the Missed, Dialed, and Received tabs you can click on the name and either call them, add them to your contacts, or jump to the caller's existing contact information.

Contacts

The Contacts tab allows you to manage all your contact information. You can also create new contacts (using recent call information like a missed call or creating a new one from scratch), create groups of contacts, or import/export your contacts.

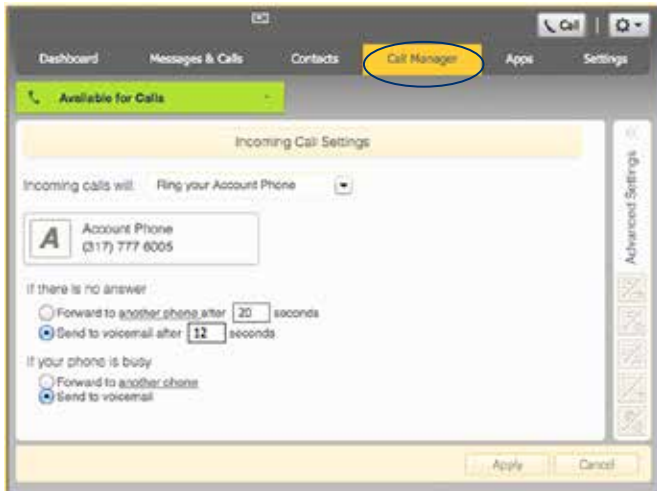

The fastest way to add your contacts is to import them from your email program. If you use Microsoft Outlook, follow these instructions:

- Open Outlook and go to the File tab, then Import and Export
- A new window should appear
- Select Export to File and Click Next
- Select Comma Separated Values from the list and click Next
- Select Contacts from the folder tree and click Next
- Save exported file as 'Outlook Contacts' and click Next, then save in a place you can easily locate such as the Desktop or My Documents
- Go back to the CommPortal Contacts tab
- Click the Import button
- Click the Browse button to find the Outlook Contacts file
- Click Import!

Call Manager

The Call Manager tab allows you to manage how incoming calls are routed to you. You can change your setting from Available to Do Not Disturb in the top section, which will route calls directly to voicemail if you're busy. There is also a forwarding option that enables simultaneous ring with your mobile device.

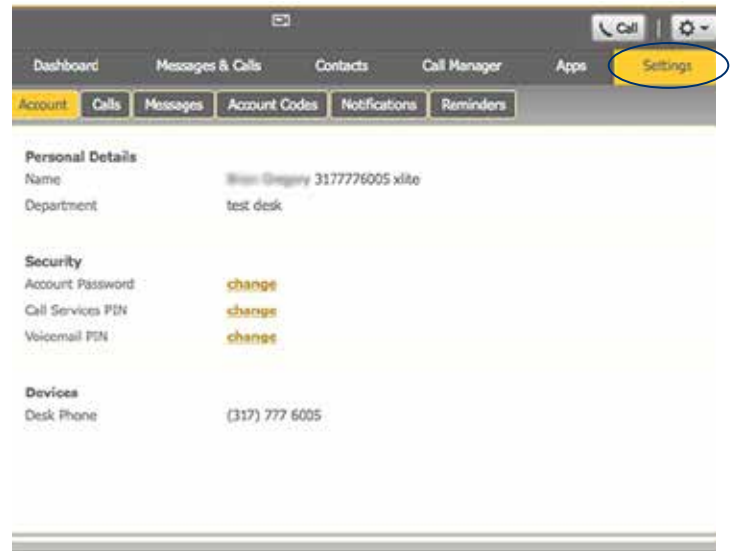

Settings

To change your password and/or PIN, click on the security options on the Accounts tab.

The Messaging tab enables you to receive notification of a voicemail as an email, manage mailbox settings, customize how you are notified of a voicemail, configure greetings, and more.

From Greetings you can personalize your voicemail greeting by recording an announcement (a microphone is required).

Use the set keys link (shown) to configure your phone according to your preferences. Once you configure your phone, you should not need to use this tab frequently.

More Information
